

REHABILITATION & EXTENDED TREATMENT - TOWNSVILLE

Carolyn Dixon & Nicole Hunt

**What has been
achieved so far?**

In Summary:

Incorporated into Clinical Reviews

Used as a team – achieve consensus

What we have learned from this experience

The Benefits

Client focused (not clinical activity focused)

Gain a team idea about a person and their needs-
consistent approach achieved

Gives a breadth to the client

Link directly to clients' specific rehab goals

Graphic view of progress for clinician and client

MHI allows client to talk about their illness

Highlights or 'frames' staff and client perceptions

Encourages reflection within a framework

Focuses staff to develop strategies

What we have learned from this experience

Needs for the Future

Aggregated data to direct program planning

Strategies for motivating participation

Resourcing

Education/incentives for Team Leaders/Service

Coordinators to drive collection of quality information.
